

# MyCoast

MyCoast is a tool for local residents to easily collect information that contributes to our understanding of local shorelines and changes in the Salish Sea.

This FREE mobile app for your smartphone provides a portal to catalog shoreline photos and observations to guide future restoration and protection efforts.

### **Storm Surge**

Monitor coastal storms, their impacts and beach changes after big storms and storm surges.

### **Take a Beach Photo**

Contribute to a time-lapse photo series of our local beaches.

### **King Tides**

Take a photo of the highest tides of the year.

### **Creosote**

Document pilings and creosote logs for removal by resource managers.

### **Large Marine Debris**

Take a photo of abandoned boats or other large debris and resource managers will work on a strategy for removal.

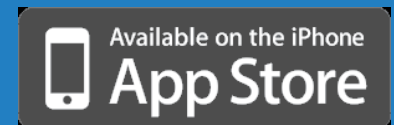

## Download MyCoast App

1. Search for “MyCoast” in app store and look for wave logo

2. Download free app

3. Create free MyCoast account

4. Take pictures!
